

ENVIRONMENTAL RISK MANAGEMENT AUTHORITY
 NGĀ KAIWHAKATŪPATO WHAKARARU TAIAO

Application Form (HS6B)
for Advice on the Status of a Substance
Pesticides and Veterinary Medicines
(for other substances, please use application form HS6A)

Send by post to: ERMA New Zealand, PO Box 131, Wellington OR
email to sos@ermanz.govt.nz

1. Contact Details

Company name:			
Company address:			
Postal address [if different to company address]			
Contact name:			
Job title			
Contact person phone:	(0)	Email:	

2. Please indicate which options you would like:

I would like informal advice on whether a substance is hazardous in terms of the HSNO Act	Yes/ No
I would like informal advice on whether the substance is covered by an approval under the HSNO Act.	Yes/ No
I would like the HSNO classification for the substance.	Yes/ No

3. Product name:

4. Synonyms:

5. Other products with similar composition and hazardous properties (if known):

6. Full composition (attach if insufficient room. **NB:** We cannot process your application without full composition details.)

Table 6.1 – Components

CAS number	Component name	Function of component	Concentration (g/L or g/kg)	Concentration (specify g/L* or g/kg)

If any of the components in Table 6.1 react to give new substances upon mixing, please indicate the FULL COMPOSITION of the final formulation in Table 6.2. New substances and amounts of any left-over components should be included.

**Table 6.2 – Final Composition**

CAS number	Component name	Function of component	Percentage (specify w/w or w/v*)

*If the product is a liquid, what is its density?.....

If the units of any component are given in terms of volume, provide the density of the component.

7. Physical form: solid/liquid/gas

8. Formulation type:

9. Uses: Pesticide Veterinary medicine

10. Flashpoint (if flammable):

11. pH (if an aqueous liquid):

12. MSDS attached: yes / no

13. Impurity profile of active ingredients:

List all impurities present in the active ingredient(s) at levels greater than or equal to 0.1%, and at any level for toxic / ecotoxic impurities or where the toxicity / ecotoxicity is unknown

14. Source of active ingredient

Name the manufacturer of the active ingredient and the location of the manufacturing plant. Also identify whether the manufacturing source has been approved by another jurisdiction

15. Initial fee of \$112.50 (GST inclusive) is included

(If fee is not included, you will be invoiced and processing will not start until payment is received)

Instructions to complete form

You need to ensure that all relevant information is provided in full before you send in the form. If the form is incomplete, we will be unable to process your application and will need to contact you to fill in the missing information.

Product name – this is the name of the product/substance for which you are seeking advice.

Synonyms – list alternative names for the product/substance for which you are seeking advice.

Other products with similar composition and hazardous properties [if known] – please identify as fully as you can products which you think may have an existing approval, or be covered by the transitional provisions of the HSNO Act. This could include compositional details of similar products owned by your company.

Full composition

If you do not have access to the full composition of the substance, you will need to ask the company who does to supply the information to ERMA New Zealand directly, with an appropriate cover letter to ensure that we can link your application to that information.

Please ensure that the composition totals 100%. If it doesn't we will not be able to start work on your application. If the composition of your substance includes ranges [e.g. 5-10%] for different components, please indicate where possible if some ingredients are optional, or are not always present. In the column headed 'function' please indicate what the purpose of the component is within the mixture.

Please check that the names of components and their accompanying CAS numbers match. A useful website for checking these details is ChemID Plus <http://chem.sis.nlm.nih.gov/chemidplus/>. If these details don't match, we will need to ask you for more information i.e. to confirm whether the name or the CAS number is correct.

Physical form - please indicate whether the substance is a solid, liquid or gas.

Density of liquid – where the substance is a liquid, please provide the density

Uses - please be as specific as possible

For pesticides include:

- target pests
- crop type eg pipfruit
- application rate in kg ai/ha;
- application frequency;
- application method eg boom sprayer;

ER-AF-HS-06B-4 05/09

- industrial/commercial use and/or residential

For veterinary medicines include:

- purpose of treatment
- species eg sheep
- dose per animal in units of mg/kg bw
- treatment frequency
- method of administration eg oral, IV etc

MSDS - please attach a Material Safety Data Sheet and/or use instructions for the substance if you have one. The MSDS is not a substitute for the other information on the form, but may assist us with related information.

Initial fee – if the request requires more than 1 hour to complete, you will be asked whether you wish to continue, and a further fee of \$100 + GST per hour will apply.
